

Report for “Movies Emotion Map”:

Team: Rima Edris, Maryam Wahbi, Hatem Khater.

Supervisor: Dr. Ossi Mokrym.

The system:

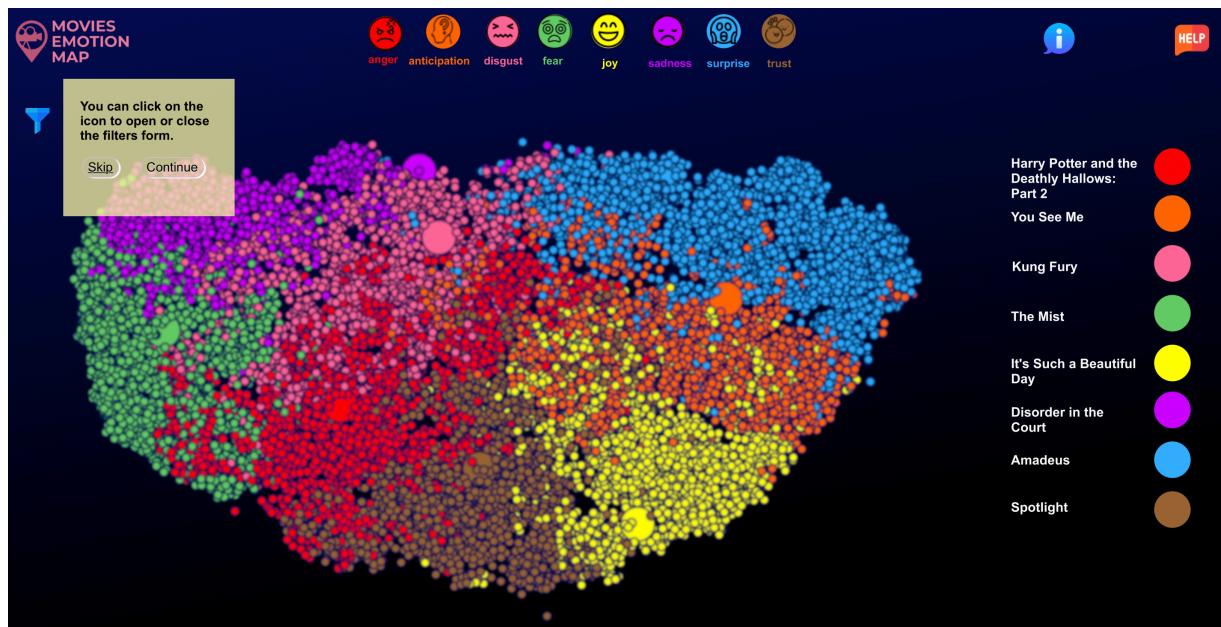

The features:

1. Help Button : by pressing the icon

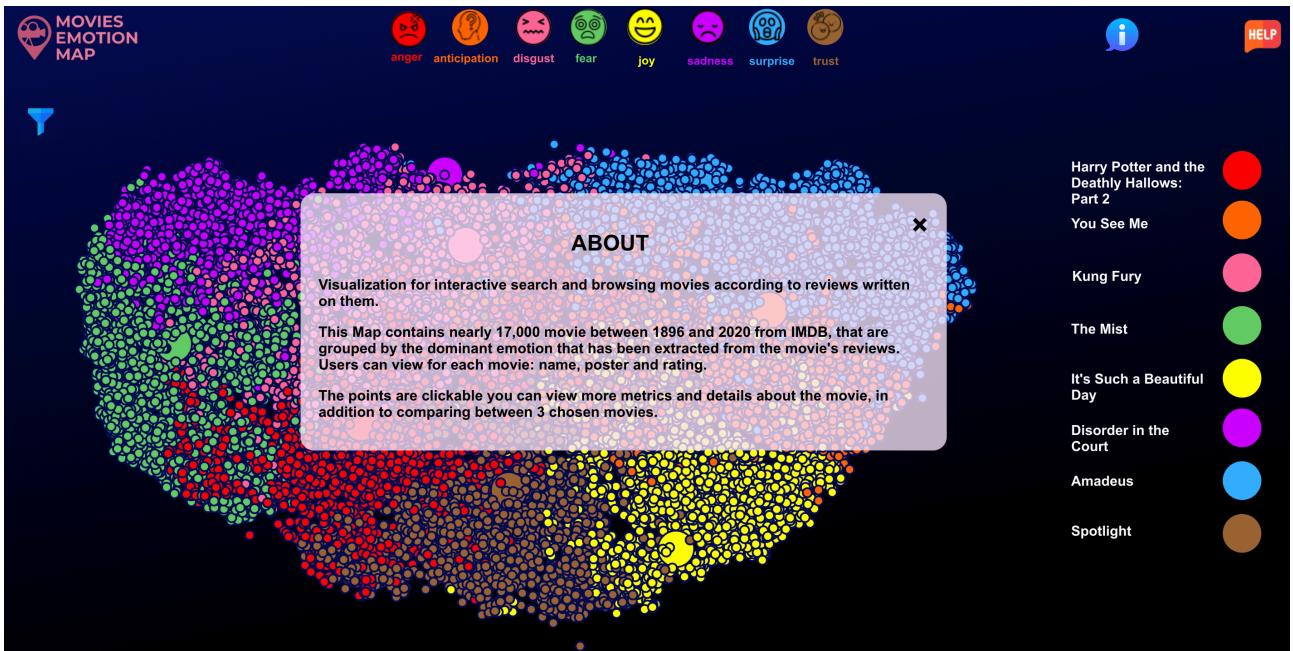

, popups that contain an

explanation for the use of the system will appear.

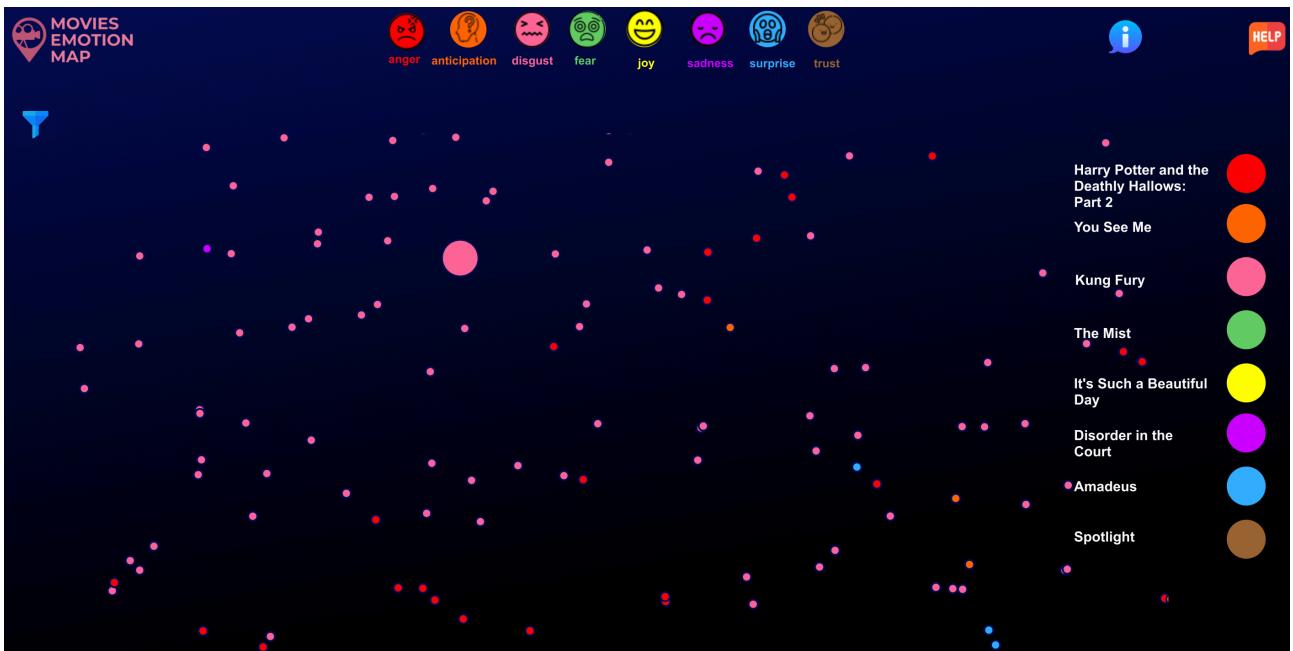

2. About Button: by pressing the  icon , popup that contains a general

information about the system.

3. Zooming: when the cursor of the mouse is on any node of the map, so we can do zoom-in or zoom-out. The goal of it to see the overlaps.

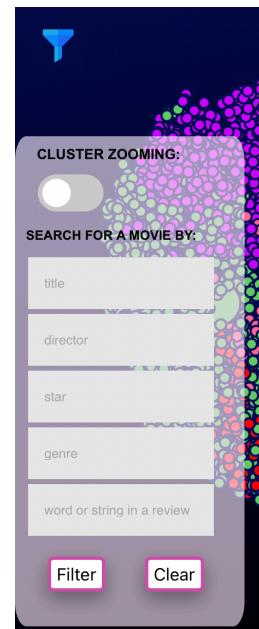

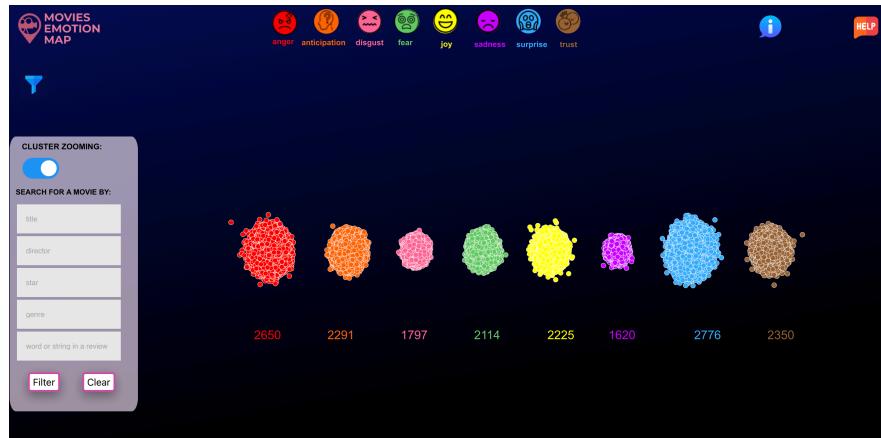

4. Filter: when pressing the icon

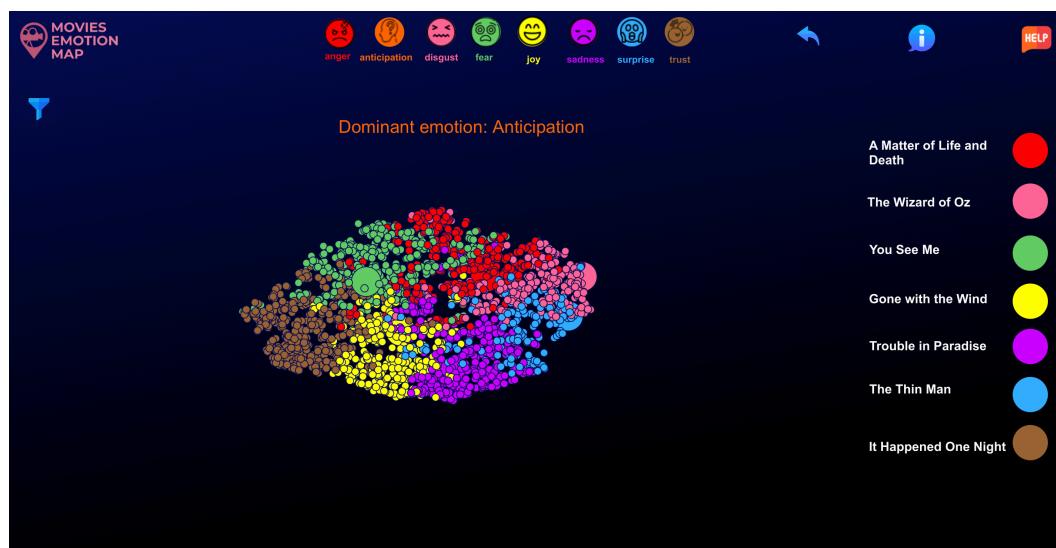

, the window filter will appear.

4.1 We can filter by “Cluster Zooming” to see each group emotion individually.

And by pressing on any group, we will see the map of this group - how this group looks forward to the other emotions.

4.2 We can filter by choosing an attribute to search about.

4.3 By pressing the button clear, the original map will appear.

5. Radar: by pressing on any node the radar window will appear, and it will contain a piece of information about this node. We can choose at most 3 nodes.
(To clean it, must close it.)
